- ✓ Strong
- ✓ Customised

✓ The Secure Storage System is proven, certified to AS/NZS 3809:1998 Safes and Strongrooms

Are you lacking storage space in your apartment?

Are you using scarce space in your apartment to secure important personal belongings such as bikes, golf clubs or other expensive sporting goods?

Or maybe you're just tired of the inconvenience of having to lug these items up the staircase or in the lift?

⚠ Theft from storage areas in under-croft carparks of apartment complexes is reaching epidemic proportions.

Then we have a solution for you!

The Secure Storage System provides you with a secure storage space in the under-croft car park of your apartment, helping you reduce clutter whilst providing the highest level of protection against theft of valuables and personal belongings.

Tired of lugging your expensive sporting equipment up to your apartment?

You don't need an apartment on the ground floor.

You need a Secure Storage System.

Most apartment storage solutions lack usability with many only offering open cages.

Not only are they open to dust, vermin and pollution, they offer no privacy of what is being stored in them and most importantly, provide very little protection against theft.

Even more frightening is many apartment residents falling victim to storage cage theft are being left exposed by their insurers. High-rise residents are often left without insurance cover for something that should be considered part of their home.

We can convert your existing cage with a Secure Storage System.

Secure Storage Systems can work with you to provide a clean and efficient solution that suits your needs and provides a secure and protected space to store your valuable goods.

Don't have an existing storage space in your under-croft car park? Don't worry!

We can develop a tailor made solution for you that suits the space available. Our systems use a shutter in lieu of a swing door which gives you more storage area with the same footprint. The shutters can be made to size and come in most COLORBOND® colours. They can also be motorised for additional ease of use.

Included in our shutter range is the exclusive Hand-E-Shutter which is certified to the highest level of security available in the market.

Don't have the space in your under-croft for a full-height storage solution?

We have a solution for you! Our new Secure Storage System, the Pod-Lock is specifically designed for those who live in apartments and have very little space available. This over-car solution is safer than anything else on the market as it has no front leg, stopping the risk of the unit collapsing on your car or worse!

Secure Storage Systems is here to help address the clear security flaw in high density living that is storage theft.

For sales and installation enquiries phone 1800 290 848 or email enquiries@securestoragesystems.com.au. To learn more about this product, visit www.securestoragesystems.com.au.
